PROJECTS

DUAL AXIS SOLAR TRACKING SYSTEM

Sep 2022 – Oct 2022

Nowadays non-renewable sources of energy are getting depleted day by day. So solar energy can be the best alternative source of energy. Solar panels are getting more popular. But they are fixed only in one direction they cannot collect a large amount of energy as the direction of the sun keeps changing the whole day. In order to overcome those problems "DUAL AXIS SOLAR TRACKING SYSTEM" can be more effective and follows the sun the whole day, and generates more power.
